24. Description of Change: (use additional Sheets if necessary)
Development has prepared fixes for two NCRs: 22566, which impacts the ability to do MOJO/JDT interface testing with the Japanese at EDC, and 22738, which impacts the ability to run PDPS for the LaRC ETEs.

25. Proposed Solution: (use additional sheets if necessary)
CSG has prepared two Sun tar files, one for MOJO and one for PDPS. SMC shall pull these tar files and shall distribute the MOJO tar file to EDC, the Mini-DAAC and the VATC, and shall distribute the PDPS tar file to LaRC, the Mini-DAAC, and the VATC.

26. Alternate Solution: (use additional sheets if necessary)
None.

27. Consequences if Change(s) are not approved: (use additional sheets if necessary)
EDC will be unable to perform interface testing with the Japanese, and LaRC will be unable to execute a full set of tests for the LaRC ETE.

28. Justification for Emergency (If Block 15 is "Emergency"):
The LaRC ETE Dry Run schedule is dependent on installing these executables in the next 48 hours.
